

ACADEMIA ENGELBERG

8th Dialogue on Science – October 14 – 16, 2009
in Engelberg, Switzerland

**Andreas Hamburger, Prof., Dr. phil. Dipl.-Psych., University of
Kassel, Kassel, Germany**

Times of Violence, Time of Care

The lecture reflects on the importance of temporal experiences in infancy, childhood and adolescence, and their impact on the development of the ability to control impulsive behavior. Parting from psychoanalytic infant research, it draws some parallels to attachment theory, mentalising, and resilience research and gives a perspective on prevention and therapy from a psychoanalytic point of view.
