

Autonome Fahrzeuge

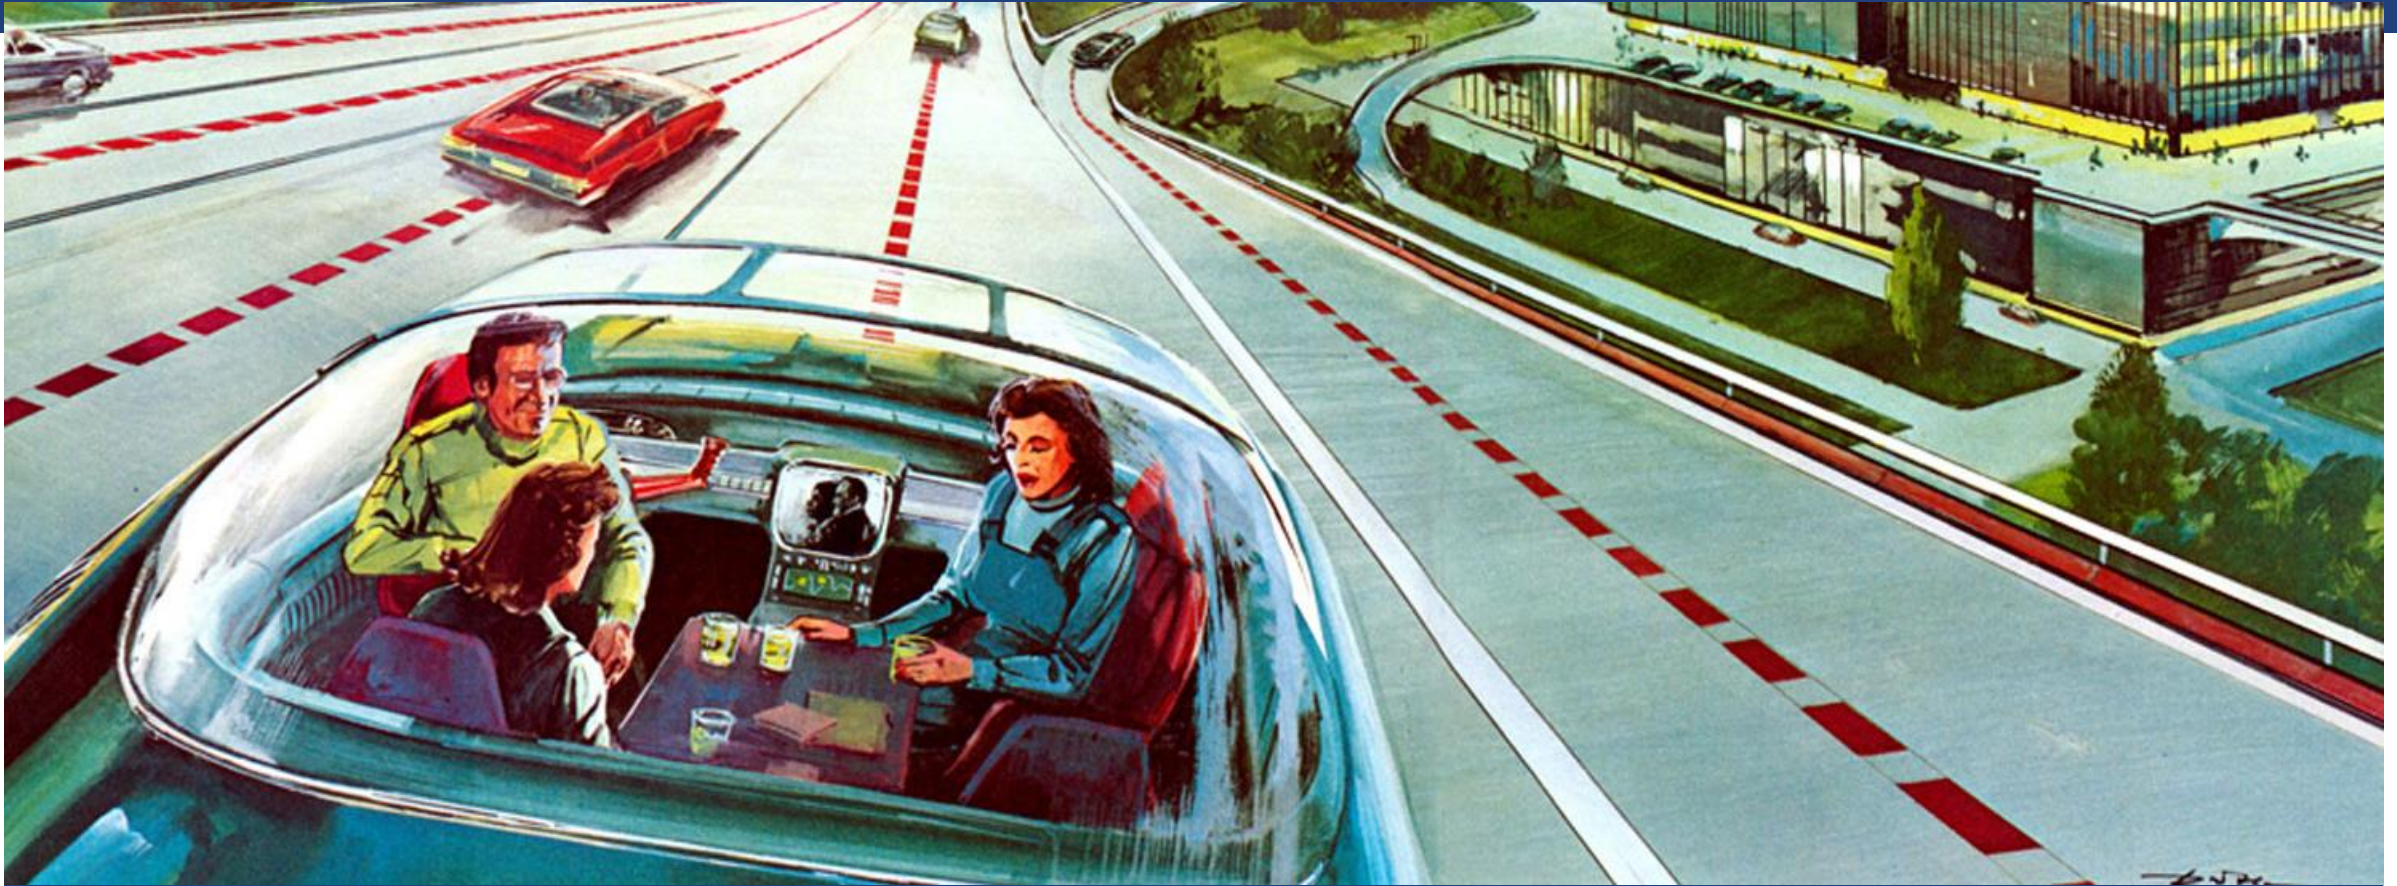

Dr. Mathias Bürki, Sevensense Robotics AG / Wyss Zurich
mathias.buerki@sevensense.ch

Engelberg, 9.10.2020

About me

- PhD graduate (2019), *at Prof. Dr. Roland Siegwart's Autonomous Systems Lab, ETH Zürich*
 - Visual (Self-)Localization for Autonomous Cars
- 2014-2015: V-Charge (FP7)
- 2016-2019: UP-Drive (H2020)

Autonomous Driving

The Victoria Advocate, March 24th, 1950

Advertisement: Central Power and Light Company

ELECTRICITY MAY BE THE DRIVER. One day your car may speed along an electric super-highway, its speed and steering automatically controlled by electronic devices embedded in the road. Travel will be more enjoyable. It will be made safe — by electricity! No traffic jams...no collisions...no driver fatigue.

Power companies build for your new electric living

Early 1960ties...

The Self-Driving Car is an Autonomous Mobile Robot

The three fundamental questions in autonomous mobile robotics:

- Where am I?

- Where do I want to go?

- How to I get there?

The Self-Driving Car is an Autonomous Mobile Robot

The three fundamental questions in autonomous mobile robotics:

- Where am I?

- How to I get there?

The Self-Driving Car is an Autonomous Mobile Robot

The three fundamental questions in autonomous mobile robotics:

- Where am I?

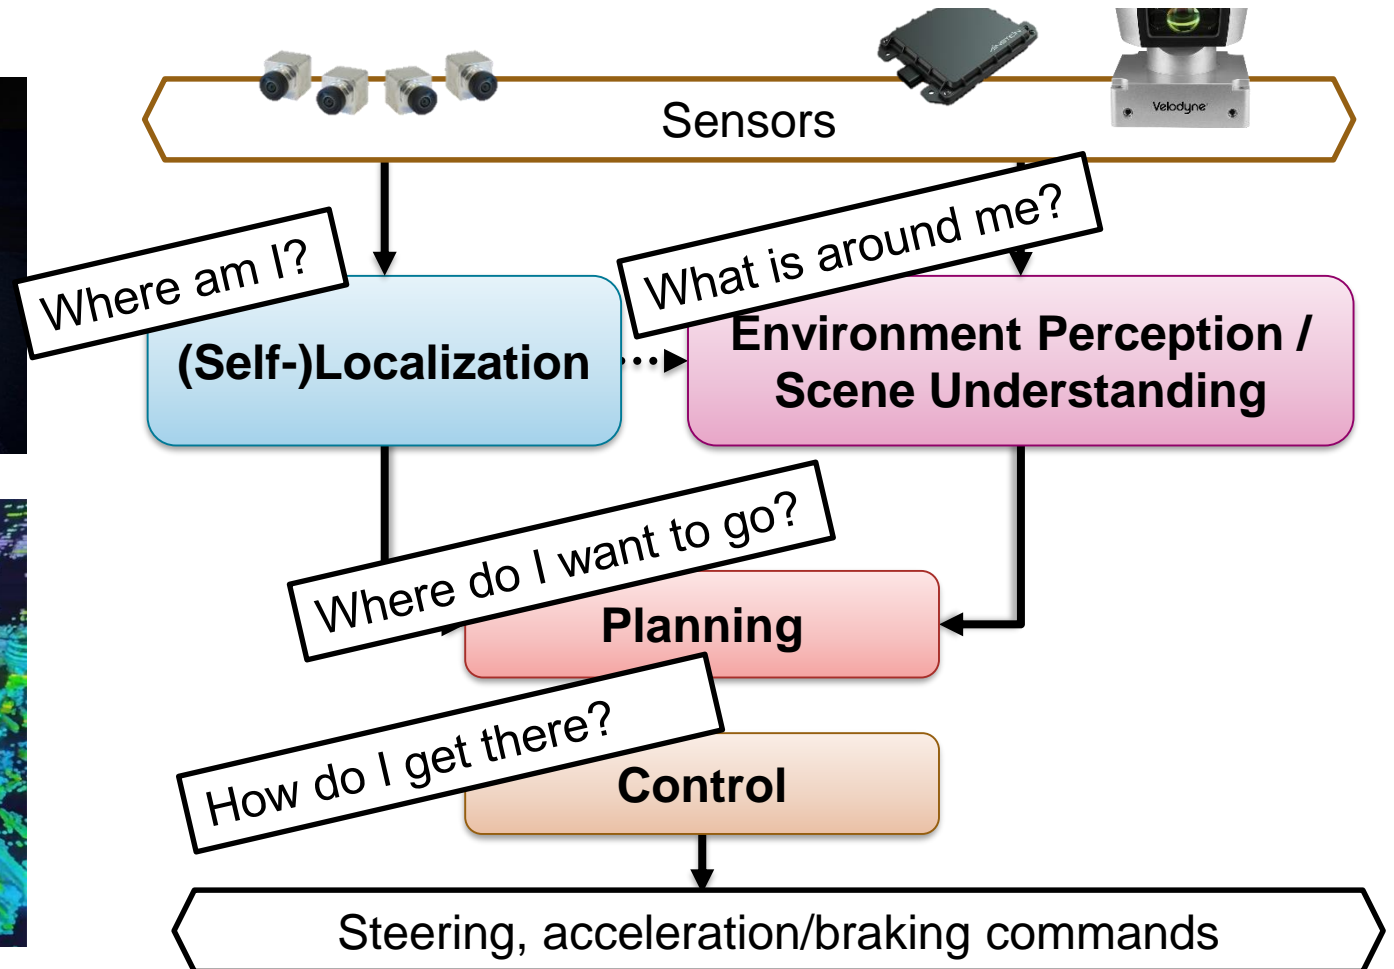

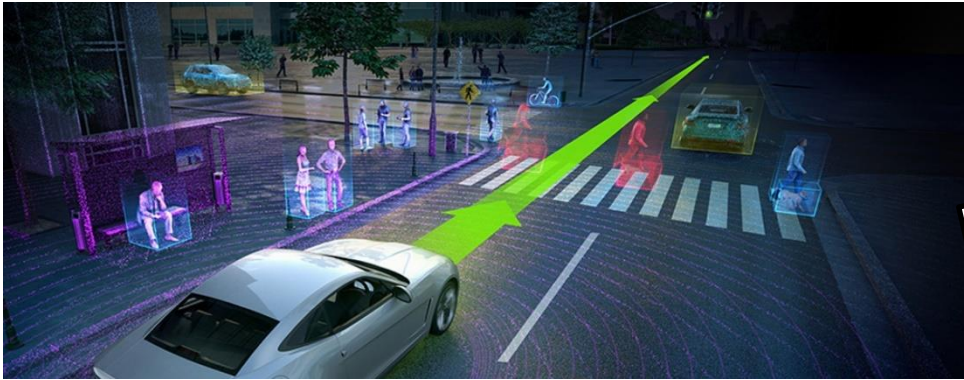

- Where do I want to go?

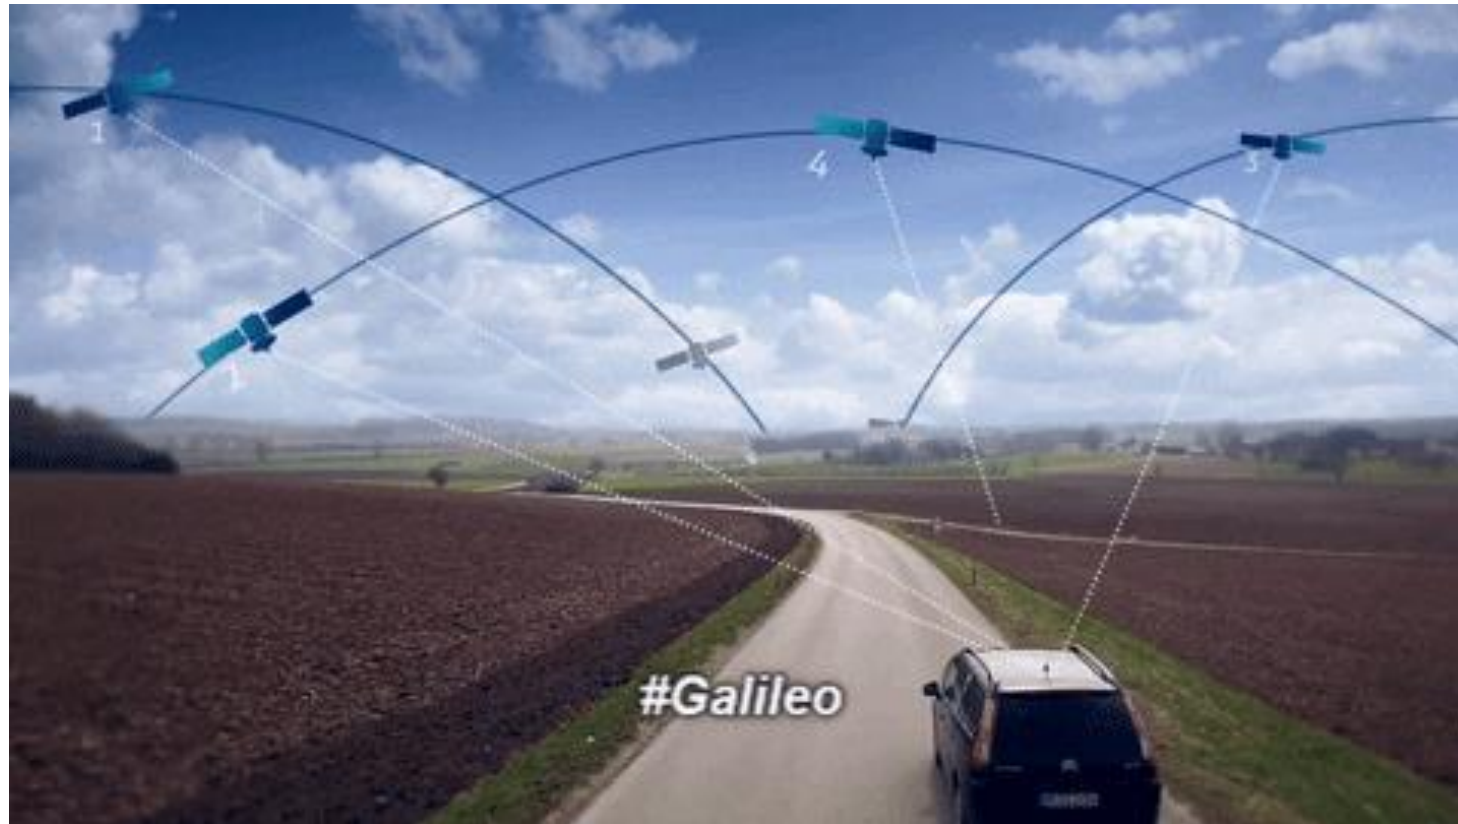

- How to I get there?
- What is around me?

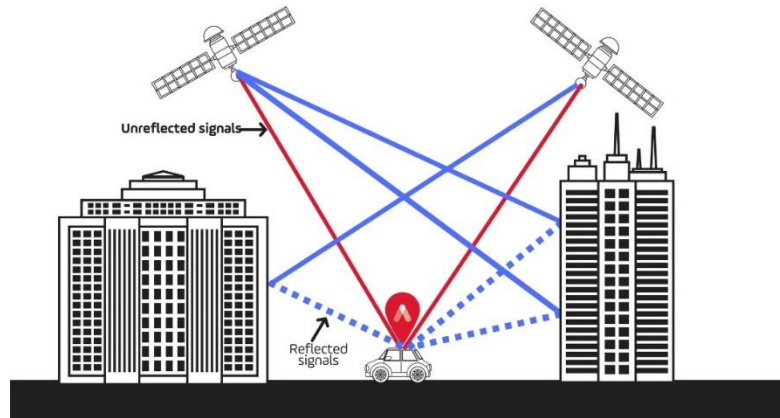

Software Modules

Localization | GPS is not sufficient outdoors

Localization | GPS is not sufficient outdoors

Multi-path: Errors > 5m

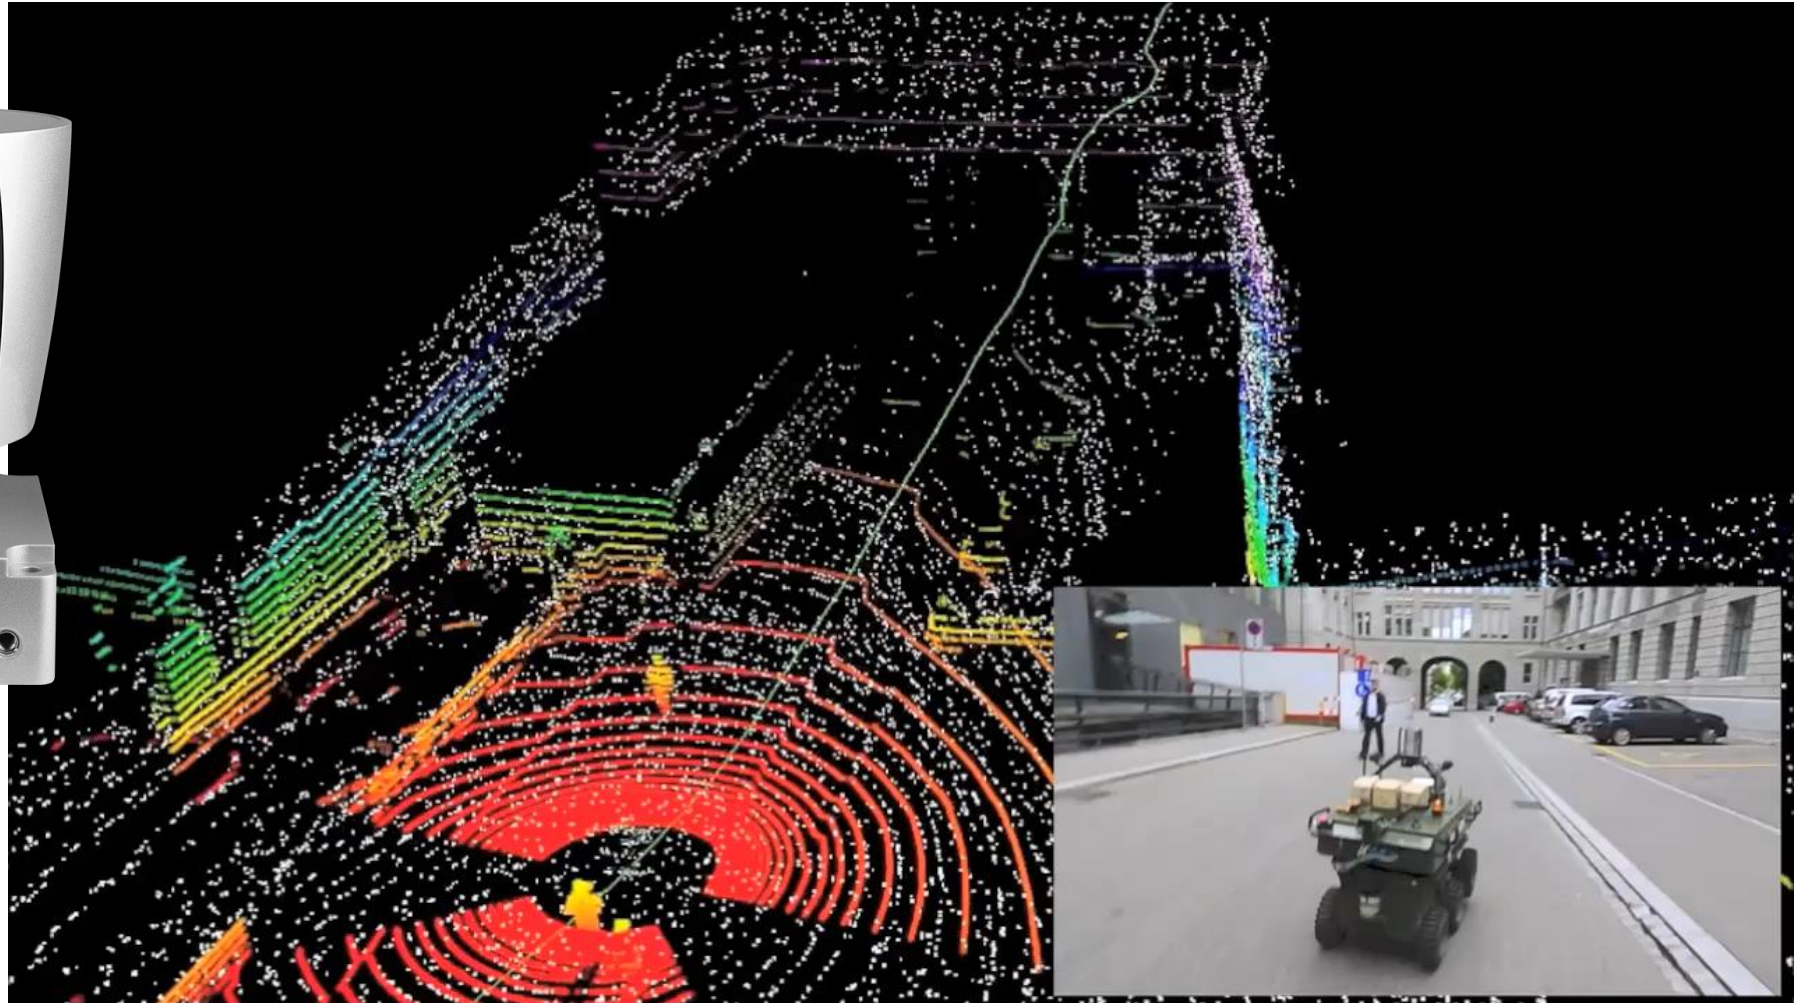

Obstructed skies

Need other sensors for localization

Localization | LiDARs

Localization | LiDARs

- + High precision
- + Invariant to changing weather and lighting conditions
- Expensive

Localization | Cameras

+ Affordable

- Sensitive to changing weather and lighting conditions

Sunny, summer

Cloudy, winter

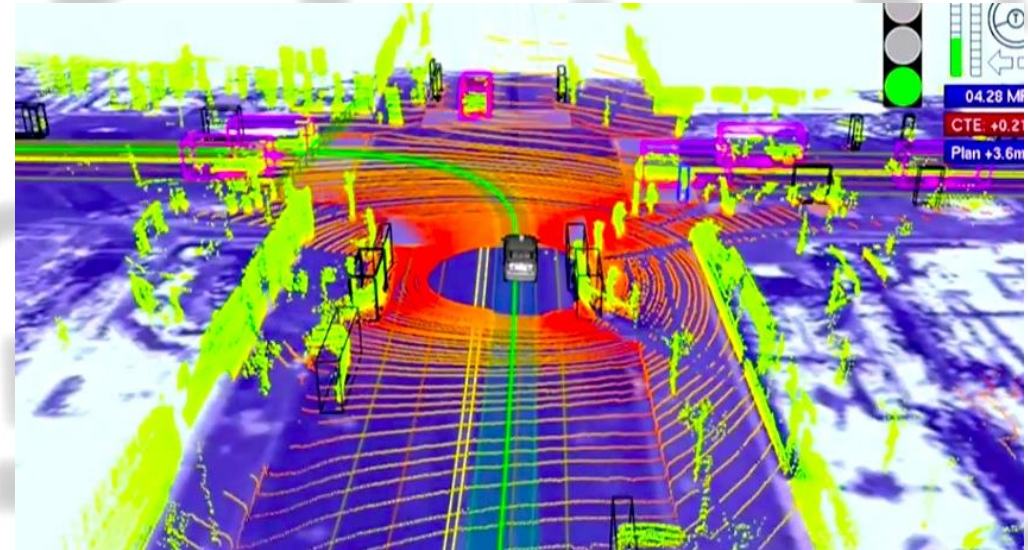

Snow, winter

Sunny, winter

Environment Perception / Scene Understanding

- What is around me?
 - Where are **other traffic participants**? What is their driving speed and direction?
 - Are there any **traffic signs** or **road markings** of my concern?
 - Where are **pedestrians**, obstacles, etc.?
 - Where are the **road lanes**?
 - Where is the **free driving space**?
 - Where can I **stop**? Where do I park?
 - ...

Environment Perception / Scene Understanding

- Image segmentation

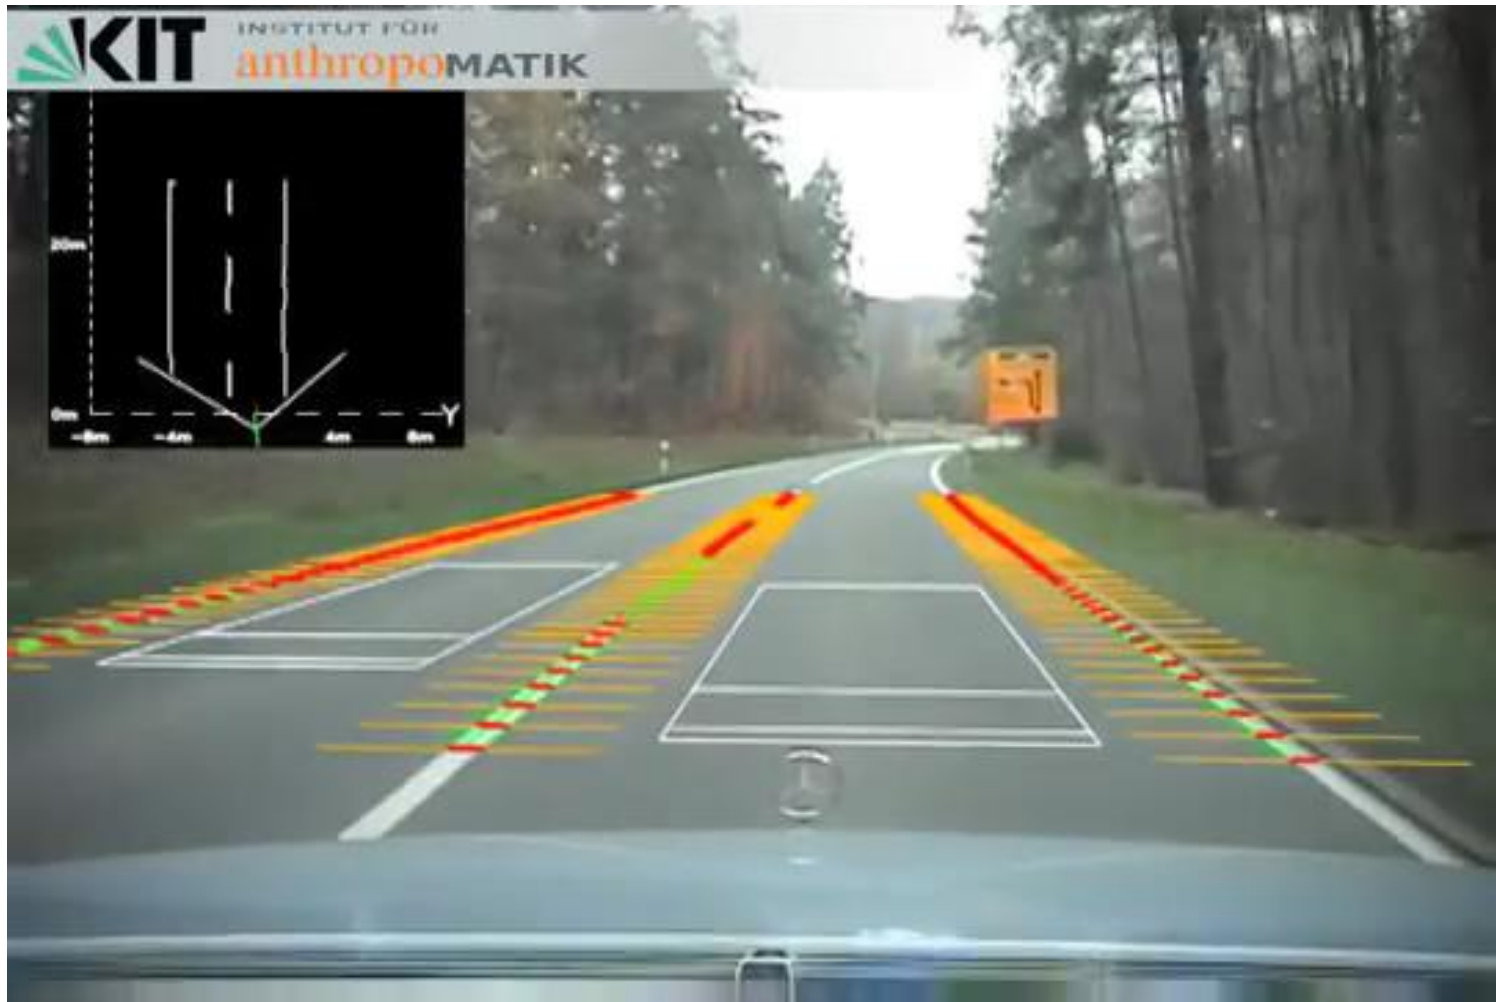

Environment Perception / Scene Understanding

- Object detection & classification

Amnon Shashua, MobileEye

The V-Charge Project

2012 - 2015

V-Charge | Vision

- Benefits
 - User comfort
 - High density parking possible

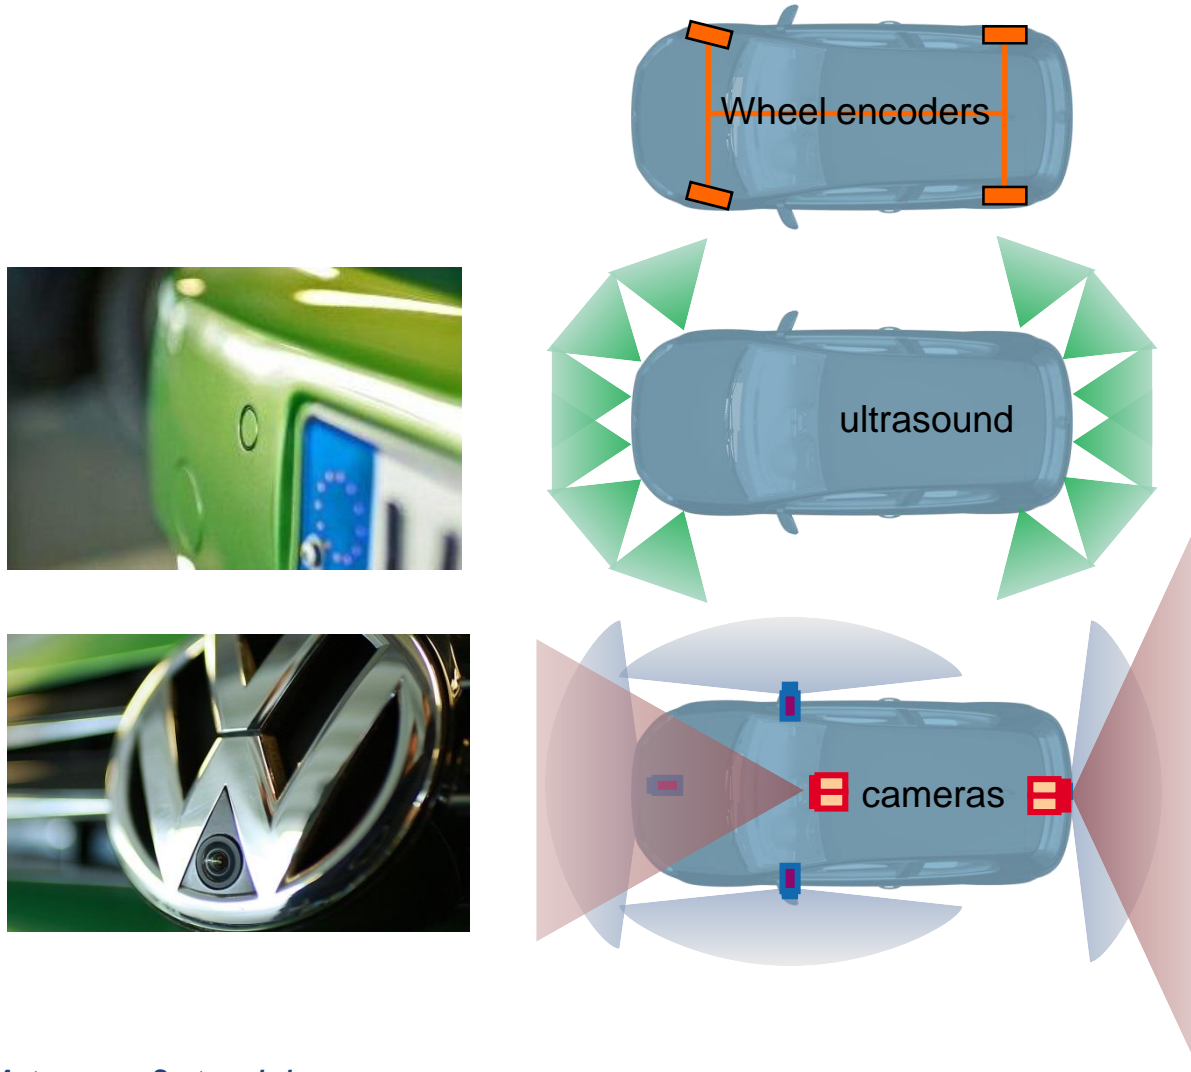

- V-Charge Vision
 - Seamless integration of individual and public transportation.
 - Autonomous valet parking of electric cars

V-Charge | Close-to-market sensors

UP-Drive

Automated Urban Parking and Driving

VOLKSWAGEN
AKTIENGESELLSCHAFT

ETH zürich

UP-Drive

Urban Parking and Driving

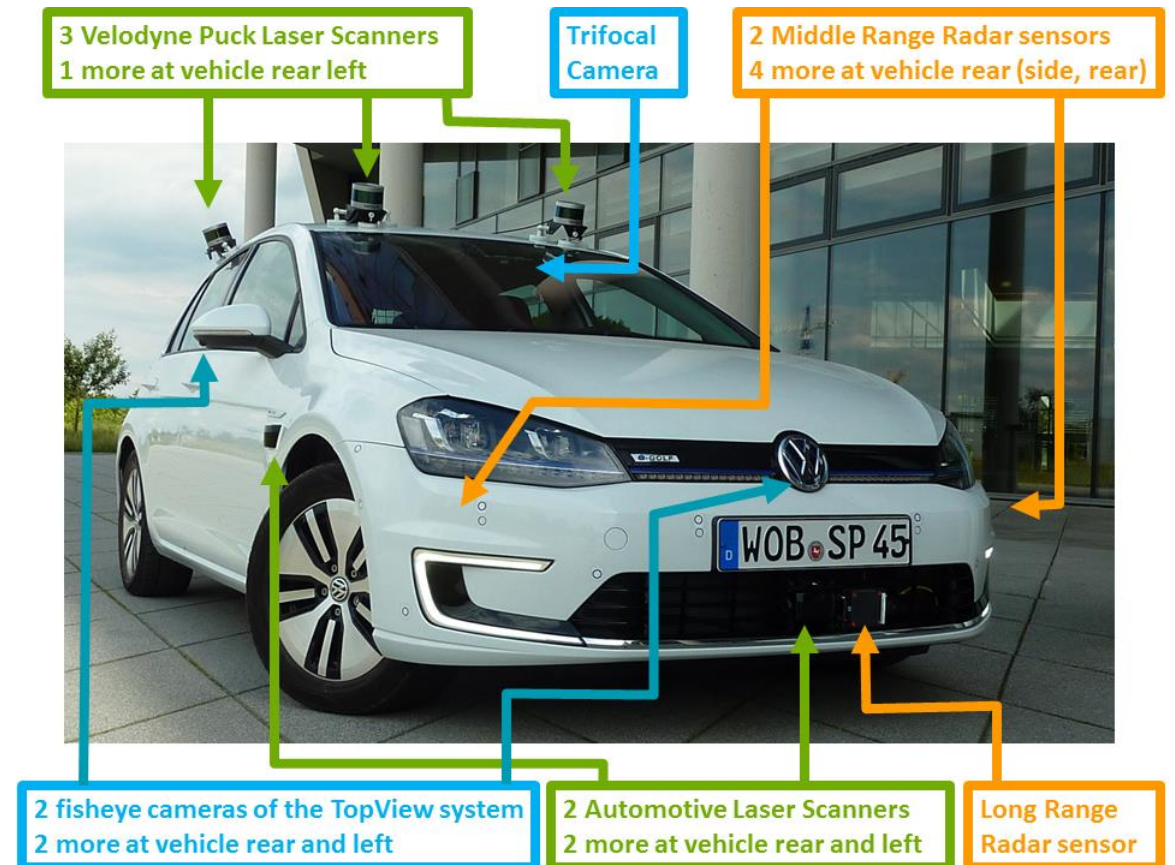

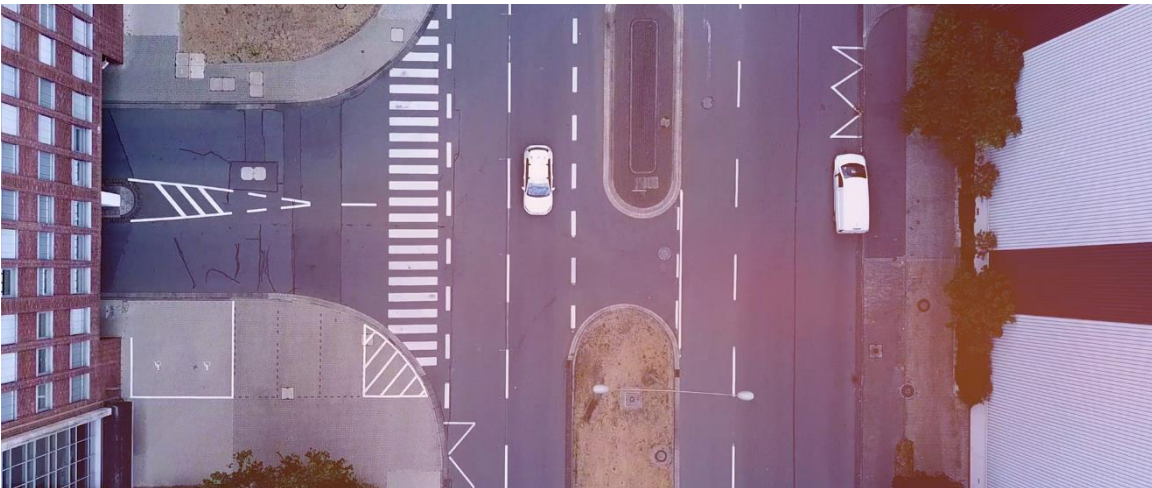

2016 - 2019

UP-Drive

- Autonomous Valet Parking in **Urban Environments**

- Multiple vehicles:
Vehicle ↔ cloud communication

➡ **Level 4 Urban Autonomous Driving**

Thank you for your attention!
